DESCRIPTION

Kson new line of Cosmic Cruiser series of computerized goto telescopes are designed for users who require good optics as well as good electronics for precise goto functions rather than just for starter use. The DC servo motors on both directions are controlled by 32-bit MPU, which adopts self-adaptive algorithm, deliverers much more accuracy for smooth movement and more rates for automatic speed corrections. Although the goto function is not as good as Kson Ekcetrik and Milestone series which use stepper motor and 64 micro-step driven technology, it is still the excellent in its kind.

The telescope is a 1250mm focal length 90mm aperture assembled on the mirror-lens scheme, so that at long focal lengths the tube is turned out quite compact. Optics is made of high quality glass and precision assembly. On the mirror surfaces are treated with a reflective aluminum coating and lens elements are coated with several layers of anti-reflective multi-coating - this combination allows you to obtain perfectly clear and sharp image without distortion.

The telescope is equipped with a red dot finder - with the help of convenient search for objects for observation use day and night. It includes two eyepieces: Kellner 25mm, Plössl 10mm. Start observation is always better with an eyepiece with a long focal length - it gives you a larger field of view and is perfect for finding the celestial bodies. The second eyepiece allows you to study astronomical objects with great magnification.

Product Specified

	Model	CC90
1	Optical Design	Maksutov Cassegrain
2	Aperture	90mm
3	Focal Length	1250mm
4	Facal Ratio	f/13.89
5	Coating	Broadband Multi-coating and Higher reflective Aluminum coating with SiO2 protection

UNAVAILABLE

6	Resolution(Dawes Limit)	1.29"
7	Limiting Magnitude	11.8
8	Lightgathering Power(vs naked eye)	165X
9	Eyepiece	1.25" KF25, PF10mm
10	Mount	Cosmic Cruiser computerized Alt/Az GOTO mount
11	Tripod	Reinforced KT4 pre-assembled Ultra sturdy metal tripod, Full Length
12	Finderscope	Red Dot Finder
13	Mirror Diagonal/Erecting Lens	1.25" Mirror Diagonal
14	Focuser	Built-in
15	Net Weight	10kg
16	Gross Weight	12kg
17	Dimensions	88X31X19.5cm

Product Contains

Cosmic Cruiser computerized goto Mount specifications:

Mount type: Alt/az computerized goto mount

Motor: DC Servo motors with encoder, both axes.

Motor resolution: 0.77 arc sec.

Hand controller: 2 lines, 16 characters LCD with back light

Database: 32000+ objects

Tracking rate: realtime processing, with self-adoptive algorithm

Tracking mode: Alt/az, EQ North/South automatic identification

Alignment Procedures: 32 bit, 0.1 arc sec, calculations

Drive System: Controlled by 32-bit MPC, with self-adoptive algorithm

Power Supply: 12V DC 500mA (Optional)

Battery required: 8pcs. AA Alkaline battery

Net weight: 2kg

Tripod: New designed three section KT4 steel tripod, legs with 1.13”, 1” and 0.87” tubes, height from 50-120cm extendiable. Tripod less than 1.6Kg, ideal for grab & go.

Special designed accessory tray enhance stability of tripod.
